DETAILED ACTION

I. The Art Unit location of this application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 2617.

II. The current office-action is in response to the application filed on 03/20/2006.

Accordingly, Claims 4-33 are cancelled and Claims 1-3 and 34-40 are pending for further examination as follows:

Claim Rejections - 35 USC § 102

III. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

IV. Claims 1, 3, 34-35 & 37 are rejected under 35 U.S.C. 102 (e) as being anticipated by Anvekar et al. [US 6684072].

Regarding Claim 1, Anvekar disclosed A system of billing in a user configurable wireless network (abstract), comprising:

A base station controller to establish and maintain communication between a wireless unit and the wireless network; (210, 200; fig.2, col.3; 63-col.4; 14)

A home location register in operative communication with the base station controller to support applications and services; (HLR; 230; fig.2, col.4; 9-14)

A service data node module in direct operative communication with the base station controller and the home location register to coordinate the applications and services supported by the home location register; (300; fig.3, col.4; 15-37).

A user end in operative communication with the service data node, allowing the user to implement service creation and service negotiation without service provider intervention; (Col.4; 15-59, Col.6; 51-63, Col.7; 32-48, Col.9; 1-12, and 39-57, Col.2; 66-Col.3; 8)

A billing manager in operative communication with the service data node module, to bill the user based on the user implemented service creation and service negotiation. (400; fig.4, Col.4; 15-59, Col.6; 51-63, Col.7; 32-48, Col.9; 1-12, and 39-57, Col.2; 66-Col.3; 8).

Regarding Claim 3, Anvekar disclosed The system of claim 1, wherein the billing manager further comprises: a billing mediator in operative connection with the service data node to receive and distribute data from the service data node; a billing processor in operative connection with the billing mediator to process the data from the billing mediator; a billing order manager in operative connection with the billing processor to manage the processed data from the billing processor; and a customer information processor in operative connection with the billing order manager to process customer information. (400; fig.4, Col.4; 15-59, Col.6; 51-63, Col.7; 32-48, Col.9; 1-12, and 39-57, Col.2; 66-Col.3; 8).

Regarding Claim 34, Anvekar disclosed A method of billing in a wireless network communications system (abstract), the method comprising:

Establishing a database in the wireless network; (400; fig.4, Col.4; 15-59, Col.6; 51-63, Col.7; 32-48, Col.9; 1-12, and 39-57, Col.2; 66-Col.3; 8)

Providing services into the database; (400; fig.4, Col.4; 15-59, Col.6; 51-63, Col.7; 32-48, Col.9; 1-12, and 39-57, Col.2; 66-Col.3; 8)

Allowing a user to select a service by accessing the database without service provider intervention and billing the user based on the selected service. (400; fig.4, Col.4; 15-59, Col.6; 51-63, Col.7; 32-48, Col.9; 1-12, and 39-57, Col.2; 66-Col.3; 8)

Regarding Claim 35, Anvekar disclosed the method of claim 34, wherein the billing is based on a wireless packet call of the selected service. (400; fig.4, Col.4; 15-59, Col.6; 51-63, Col.7; 32-48, Col.9; 1-12, and 39-57, Col.2; 66-Col.3; 8)

Regarding Claim 37, Anvekar disclosed the method of claim 34, wherein the billing is based on a profile change of the user. (400; fig.4, Col.4; 15-59, Col.6; 51-63, Col.7; 32-48, Col.9; 1-12, and 39-57, Col.2; 66-Col.3; 8)

Claim Rejections - 35 USC § 103

V. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2617

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

VI. Claims 2, 36, 40, are rejected under 35 U.S.C. 103(a) as being unpatentable over Anvekar et al. [US 6684072] in view of Bianconi et al. [US 20020119766].

Regarding Claims 2, 40, the above combination disclosed all the particulars of the claim except a database to store quality of services. However, Bianconi teaches in an analogous art, that the system of claims 1, 34, wherein the service data node module further comprises:
A database to store quality of services; (0010; pg.2).

A dynamic billing information processor in operative communication with the database, to determine actual use of a service on a call-by-call or session-by-session basis; (0010; pg.2)
and

A radius accounting server in operative communication with the dynamic billing information processor, to correlate the determined actual use from the dynamic billing information processor. (0033; pg.4). Therefore, it would have been obvious to one of ordinary skill in the art at the time of invention to include a database to store quality of services in order to provide location based billing of data services.

Regarding Claim 36, the above combination disclosed all the particulars of the claim except a database to store quality of services. However, Bianconi teaches in an analogous art, that the method of claim 34, wherein the billing is based on a quality of service of the selected service. (0010; pg.2).

VII. Claim 38 is rejected under 35 U.S.C. 103(a) as being unpatentable over Anvekar in view of Lohtia et al.

Regarding Claim 38, Anvekar disclosed all the particulars of the claim except wherein the selected service comprises content push services. However, Lohtia teaches in an analogous art, that the method of claim 34, wherein the selected service comprises content push services. (SMS; pg.3; 0024) Therefore, it would have been obvious to one of ordinary skill in the art at the time of invention to include wherein the selected service comprises content push services in order to provide information to a communication device in response to a request for particular service.

Art Unit: 2617

VIII. Claim 39 is rejected under 35 U.S.C. 103(a) as being unpatentable over Anvekar in view of Sarkki et al.

Regarding Claim 39, Anvekar disclosed all the particulars of the claim except wherein the selected service comprises transaction based services. However, Sarkki teaches in an analogous art, that the method of claim 34, wherein the selected service comprises transaction based services. (Col.4; 1-12) Therefore, it would have been obvious to one of ordinary skill in the art at the time of invention to include wherein the selected service comprises transaction based services in order to provide transaction based billing for telephone services.

Response to Amendment

IX. Applicant's arguments with respect to claims 1-3 & 34-40 have been fully considered but are moot in view of the new ground(s) of rejection.

Conclusion

X. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sharad Rampuria whose telephone number is (571) 272-7870. The examiner can normally be reached on M-F. (8:30-5).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, George Eng can be reached on (571) 272-7495. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
